

ALPINE SURFER DLX Snowboard simulator

The Alpine Surfer offers a unique and entertaining interactive snowboard-simulation. It requires from the player a combination of both skill and speed. All moves of the snowboarder are there : swing and edge, slide slip or Bank Turn. Or use the jump move to beat your opponent and gain the fastest time ! And special controls allow you to perform the coolest of mid-air tricks.

Players can select from different slopes with various grades of difficulty. They can then compete against computer-generated opponents or against time.

The computer also keeps track of the results achieved by various players. This makes it possible to set up your own pre- or après snowboard-competition, without taking the risk of breaking a leg !

The 120 cms (diagonal) big retro-projection screen shows high quality 3D-graphics.

Technical details

Dimensions :

W115 x D241 x H229 cm

Weight : approx. 382 kgs.

Power : 1 x 10 Amps, 220 Volts

Installation time : 20 mins.

Capacity : 20-30/hour
