

## Laser Protector

LaserProtector is a system with a web of laser-beams to protect a treasure (or your product?) which is placed in a display-case in the center. When you touch a laser-beam a siren goes off ! Will you succeed to pass through the laser-beams within a certain time and steal the treasure ?

### The LaserProtector package :

- laser Protector system with web of laserbeams and 10 active detectors,
- alarm siren,
- soundsystem with suspense generating background music,
- display case for the valuable object,
- smoke machine,
- light-effect

### Technical details :

**Minimum Space required** : +/- 6 x 6 meters, with a very solid floor

**Area** : dark and without smoke-detectors

**Electrical Power consumption** : 220-240 volt, 10 amp

**Installation time** : +/- 45 minuts

**Capacity** : max 30 players/hour

### Some ideas :

- *Use your own product as the valuable object to be stolen. This can in some cases also be used as the price you can win.*
- *Blindfold the player who tries to reach the object and let him act on instructions given by his team-members..*
