

VIRTUAL OLYMPICS

Virtual Olympics ® is a spectacular team-building event for groups going from 10 to 500 people. It's a breath-taking competition where real sports are replaced by simulators and Virtual Reality systems.

Depending on the needs of the customer (how many players, how much time available, theme of the event,...) We design a competition with a certain number of sports. Sports available include : skiing, snowboarding, football, jet-ski, powerboat racing, clay-shooting, golf, boxing, skating, mountain-biking, rafting,... But we can also add some not really existing sports such as prop-cycling or laser-sports. And many clients also like us to add some motorized sports : Formula 1-racing, rally, motorbike-racing or karting,...

The players are divided into a number of teams. Each team has a name and a captain.

In the first part of the event all participants can play freely on any simulator they like. After this period the team-captains will fill in the names of the competitors for their teams on pre-printed forms and hand these over to our referees. Very often we also let the team use one or two jokers. On the

tests with the joker they will get double points. Then the Olympic flame is lit and the competition starts...

All results go immediately in the computer. This allows us to follow the overall-results very closely and to generate quickly the final result. To keep track of the results we use projection-screens or monitors. We also have very often a host with a wireless microphone walking around and reporting on the competition.

At the end of the event there's the big moment of the day : the ceremony where we give the final results and where the teams receive their prizes and medals.

Options :

Virtual Olympics ® for up to 100 individual players.

Themed Virtual Olympics®, with e.g. only winter-sports, water-sports, motor-sports or cyber-sports.

Virtual Olympics ® has proven to be a great team-building event. It's innovative, it's great competition, big fun and it stays in the memory of the competitors for a very long time !
