

# EXTREME SPORTS

## Virtual snowboarding

The Virtual Extreme Sports is one of the first products developed by AniMotion! The players stand on a board in the cyber-ring. They play by moving the board with their feet and shifting their bodyweight from one side of the board to the other. The player sees and hears the results of his actions in the VR-helmet. Two 71 cm-monitors allow the viewers to follow the action. Great competition and entertainment!

### **Technical details :**

**Space required :** circle of 200 cm diameter + 2 consoles of 80 x 60 cm
