

PROPCYCLE

The « PropCycle » is a combination of a propeller-aircraft and a bicycle. You just have to move the pedals and you will fly through the air in marvellous landscapes with a number of airballoons flying around. If you can steer and pedal in the right way you can touch these airballoons which will gain you a number of points. In the mean time you can make the most impressive dives or loops with your “PropCycle”.

Technical details :

Dimensions : 280 cm D x 125 cm W x 205 cm H

Weight : approx 380 kgs

Installation time : 30 mins

Capacity : 25 players/hour

Linkable : no
