

AQUAJET DLX jet-ski simulator

The AquaJet is the best jetski-simulator available. It simulates a stand-up waterbike which provides greater action and fun.

Feel the Waves of the Sea

Players control the machine by shifting their weight to swing a step. They feel like they control a real waterbike. The waterbike pitches, rolls and yaws according to the condition. An air spring reproduces the feeling of the waving surface of the water.

Jumping platforms, swells, waterfalls are provided in the course. Players can enjoy the situation that they cannot experience in driving a real waterbike.

Game

A player drives the waterbike along the course surrounded by the ground and the buoys as fast as possible and within a certain time limit. A bonus-time is added to the

initial time provided every time a player passes the check-line. When the remaining time is none, the game is over at the point.

Evaluation System

When a player makes the finish line his place is displayed. In case of an excellent record he can enter his name.

Technical details

Dimensions :

height : 227 cm

width : 137 cm

length : 277 cm

Weight :

482 kg

Projector :

127 cm screen (diagonal)

Power consumption :

10 Amps, 220 Volts

Installation time :

15 to 30 minutes

Capacity :

20-25 persons/hour
