

GOLF PUTTING ULTIMATE EDITION GOLF PUTTING SIMULATOR

You will never get bored with the "Golf Putting Challenge II"-simulator!

With no less than 72 holes (divided over 4 courses) there's quite some opportunity to practice your putting skills. This is possible by breakthrough technology that reshapes the contours of the green in no time. A patented sensor system keeps score of every 1-, 2-, or 3 put for up to 4 players on any number of holes.

You can play alone or up to 4 players can compete against each other.

A voice/sound system announces player's turn, hole number, handicap, ... and even cheers for a hole-in-one. Balls are returned automatically and the scores can be read on a digital display. It's that easy!

Technical details :

Space required : 3,5 x 2 m

Power supply : 220-240 volts, 2 amps

Installation time : 15 mins

Capacity : max 4 players in one game,
max +/- 20 players/hour
