

M I N D M A C H I N E S

*The healthiest and most entertaining way
to find mental relaxation or stimulation !*

Mind-machines are headsets that send light-signals to the brain. These signals come from a high-tech controller and have – depending on the used range of frequencies a relaxing or stimulating effect on the human mind.

When you lay down in a comfortable seat and put on the headset you will soon feel the effect of the mind-machine. Nervous thoughts in your brain will be calmed down and after a short while you will feel relaxed and concentrated. Your brain will start to generate the most amazing patterns of colors, rhythms and images and this all of course supported by a landscape of matching sounds.

The mind-machines come to you with special ultra-easy seats, headsets, computer, sound-system and an operator. Try !

Technical details :

Space required : set of 6 units : 5 x 3 meter
Set of 10 units : 8 x 3 meter
Power supply : 220-240 volts, 10 amps
Capacity : max. 6 persons/hour/unit
Installation time : 30-45 mins
