

# Thomson Venturer Portable Simulator

Where space is restricted but demand for entertainment is just as high, the Venturer Motionride with 14 seats is the ideal system.

Taking up only some 45 square meters, the Venturer is the ideal attraction for exhibitions, events, attraction parks and anywhere else where space is at a premium.

Operating as a self-contained unit, the Venturer can handle up to 150 customers per hour and it's backed by a thrilling library of rides.

Using CRV digital video-disc technology and a high performance digital sound system, the Venturer Motionride delivers an unforgettable experience !

## Size and Portability

The Venturer static simulator can be operated either indoor or outside on a site of just 45 square meters.

Including surround and entry platforms it requires a space which is 5,00 m wide, 5,00 m high and 9 m long.

Total weight is around 8 tons.

The simulator is built on a hydraulic base and can be transported anywhere with a special low loader trailer.

## High Capacity

The capsule accommodates up to 14 people at a time. With a typical ride of less than 4 minutes, each Venturer can take around 150 persons per hour.

The actual experience can be simply changed by loading a different program which takes a few seconds.

## Safety

The capsule motion is carefully controlled so that the intensity of the movement can be scaled to suit the wishes of the customers.

The computer monitors all safety systems and, if necessary, the ride can be stopped instantly and returned to a level position, which happens automatically in the event of a power failure.

Venturer has been fully tested and meets the stringent requirements of the German TUV-standards and EC-regulations.

**Space required** : 9 x 5 meters, 5m high  
**Power consumption** : 63 amps 3-phase 380-400 volts  
**Weight** : 8000 kg  
**Operation** : indoor + outdoor  
**Capacity** : +/- 150 persons/hour
